How Can You Get Involved?

- Donate to one of our causes
(Donations are Tax Exempt under 80G section of Indian Income Tax Act)
- Partner with us on a project
- Sponsor a deserving student
- Volunteer with us

WHO ARE WE?

Founded in 2018, Chinnasamy Nagalingam Institute of Medical Science and Research Foundation (CNIMS) works in the Lathur and Thirukazhukundram blocks of Chengalpattu District, Tamil Nadu.

CNIMS envisions an equitable future where rural communities are empowered to mobilize, organize and work towards their own upliftment. CNIMS aims to empower rural communities, with a special focus on the marginalized sections, and ensure equitable access to education, health and socio-economic development.

“Our vision at CNIMS Research Foundation is to create happy, healthy, aware and empowered rural communities. Through holistic and research-based activities, we are working towards empowering rural communities at large, with a special focus on socio-economically disadvantaged women, children and youth.”

- Founder, CNIMS Research Foundation

Sri Sai Paramedical Training Institute

We have established Sri Sai Paramedical Training Institute to train young women to become nurses and paramedics. Several young women trained at our institute have moved towards socio-economic empowerment. At CNIMS, we provide scholarships to deserving students to prevent dropouts and also offer placements opportunities.

This initiative has improved the percentage of young women pursuing higher education and employment while also reducing early marriage. The program includes awareness creation to help the young women to know their rights, develop skills and hone their hidden talents.

We are on a mission to

- Improve access to quality health and education to the communities
- Improve health, hygiene and sanitation indicators in our project implementation areas
- Organize and manage research and development activities in arts, science and education
- Strengthen access to correct information and increase awareness for informed decision making
- Improve livelihoods of rural communities, focused on youth, through linkages to relevant resources

WHAT WE DO

Key Areas of Focus

Education	Skill Development
Health, Hygiene and Sanitation	Rural Development

Our Other Activities:

- Health camps
- School-based awareness activities
- Skill training
- Disaster relief
- Livelihood programmes
